SPECIFICATIONS

Playback system	DVD-Video , Video CD , CD	S-VIDEO OUT	
Playback standard	NTSC or PAL	Y	1.0 Vp-p (75 ohm)
Laser	Semiconductor laser, wavelength 650/790nm	C	0.286 Vp-p (75 ohm) (NTSC) 0.3 Vp-p (75 ohm) (PAL)
	Laser output (Continuous wave max.) : 1 mW(DVD) , 0.5 mW(CD)	VIDEO OUT	1.0 Vp-p (75 ohm)
Frequency range (digital audio)		AUDIO OUT	L, R : 2.0 V rms
.....	4 Hz to 22 kHz	5.1CH DISCRETE AUDIO OUT ...	FRONT L, R: 2 V rms
Signal to noise ratio	More than 105 dB	(9501/SS, 9501KR/KR)	SURROUND L, R: 2 V rms
Harmonic distortion	0.003 %		CENTER: 2 V rms
Wow and flutter	Below measurable level		SUB WOOFER: 2 V rms
Output:		Power requirements	AC 220 V 60 Hz(KR) 110 - 240 V, 50/60 Hz(SS) 120 V, 60 Hz(US, CA)
DIGITAL OUTPUT :		Power consumption	14.5 Watts
For optical cable		Dimensions (W x H x D)	Approx. 435 x 79 x 281 mm
COMPONENT VIDEO OUT		Weight	Approx. 3 Kg
Y	1.0 Vp-p (75 ohm)		
CB , CR	0.7 Vp-p (75 ohm)		

Specifications subject to change without notice.

LASER BEAM SAFETY PRECAUTION

- Pickup that emits a laser beam is used on this DVD section.

CAUTION :

USE OF CONTROLS OR ADJUSTMENTS OR PERFORMANCE OF PROCEDURES OTHER THAN THOSE SPECIFIED HEREIN MAY RESULT IN HAZARDOUS RADIATION EXPOSURE.

LASER OUTPUT 1/0.5 mW Max. (CW)

WAVE LENGTH 650/790 nm

CLASS 1 LASER PRODUCT
LUOKAN 1 LASERLAITE
KLASS 1 LASERAPPARAT

CAUTION – INVISIBLE LASER RADIATION WHEN OPEN AND INTERLOCKS DEFEATED. AVOID EXPOSURE TO BEAM.	
ADVARSEL – USYNLIG LASER STRÅLING VED ÅBNING, NÅR SIKKERHEDSAFBRYDERE ER UDE AF FUNKTION, UNDGA UDSÆTTELSE FOR STRÅLING.	
VARNING – ÖSYNLIG LASER STRÅLNING NÅR DENNA DEL ÄR ÖPPNAD OCH SPÄRR ÄR URKOPPLAD. STRÅLEN ÄR FARLIG.	
VORSICHT – UNSICHTBARE LASERSTRAHLUNG TRITT AUS, WENN DECKEL GEÖFFNET UND WENN SICHERHEITSVERRIEGELUNG ÜBERBRÜCKT IST. NICHT, DEM STRAHL AUSSETZEN.	
VARO – AVATTAESSA JA SUOJALUKITUS OHITETTAESSA OLET ALTTIINA NÄKYMÄTTÖMÄLLE LASERSÄTEILYLLE. ÄLÄ KATSO SÄTEESEEN.	

DVD MECHANISM REPLACEMENT

1. Cautionary instructions in handling the assy (Safety instructions)

Optical pickup

The laser beam used in the pickup is classified as "class 2". Exposing your eyes or skin to the beam is harmful. Take care not to do so.

(Caution against static electricity and leakage voltage)

Ground securely the work tables, tools, fixtures, soldering irons (including those made of ceramic) and measuring instruments used in the production lines and inspection departments that handle loaders. The workers shall also be grounded.

(Cautionary instructions in handling)

Do not touch the object lens when handling a loader, or the lens will be stained, resulting in inadequate playability.

There is no power supply protection circuit provided for this product or adjustment/inspection device. Short-circuiting may lead to fire or damage.

Take care so as to protect from exposure to water, the entry of metallic pieces or dew condensation.

In particular, a strong magnet adjacent to the pickup will not only get inoperative but can damage the pickup if a small metallic piece, such as a screw or swarf, enters.

The loader edge can cause injury if inadvertently handled.

Do not touch a rotating disk, or injury may result.

This product is a precision device. Handle carefully.

A shock or dropping will cause misalignment or destruction. If it should occur, refer to clause 2.

This product is so designed as to endure an initial shock equivalent to a drop from a height of approx. 90 cm under the packed condition.

After the initial shock, the resistivity will still remain at a level of 50 to 60 G, but the mechanical robustness will weaken.

Do not place in a dusty location.

The entry and deposition of dirt into or on the pickup lens or moving section will cause malfunction or degradation.

(Connectors)

Do not connect or disconnect while power is on.

Connecting or disconnecting signal wires or the main power cord when the power is on may destruct the unit or fixture.

When connecting, push all the way in securely.

An insufficient insertion may cause a bad contact, leading to an erroneous operation.

Do not connect or disconnect roughly by an excessively strong force, or a broken wire or bad contact may result.

Semiconductors are connected. Do not touch connector terminals directly.

If the worker is grounded, there is nothing to worry about static electricity, but the rust on the connector terminal surface caused by the touch may result in bad contact.

(Power source)

The power source need be good in quality (free from instantaneous interruptions or noises).

A low quality power source may well cause malfunction.

(Storage)

Do not place or store in a dusty place or a place where dew condensation is possible.

The entry and deposition of dirt or dust into or on the pickup lens or moving section will cause malfunction or degradation.

Also, dew condensation causes rust; the rust penetrates into the precision part of a pickup, causing malfunction, or degrading the optical quality of the internal lens and reflector, which also leads to malfunction.

MECHANISM REPLACEMENT

1. TRAY AND BASE MECHANISM PART

2. Base mechanism mounting PART

3. TRAY PART

4. BASE MECHANISM PART

Do not remove the pick-up from base mechanism because of adjustment difficulty.

MECHANISM OPERATION

1. How to setting the tray.

1. Move the SLIDE left side.
2. Match the Hole of GEAR ⑤ and Hole of CHASSIS ④.

3. Match the mark of GEAR ② and mark of GEAR ③, and then install the BOSS.
4. Turn the GEAR ① counterclockwise, and then SLIDE move right side.
5. The GEAR ① move from side to side.

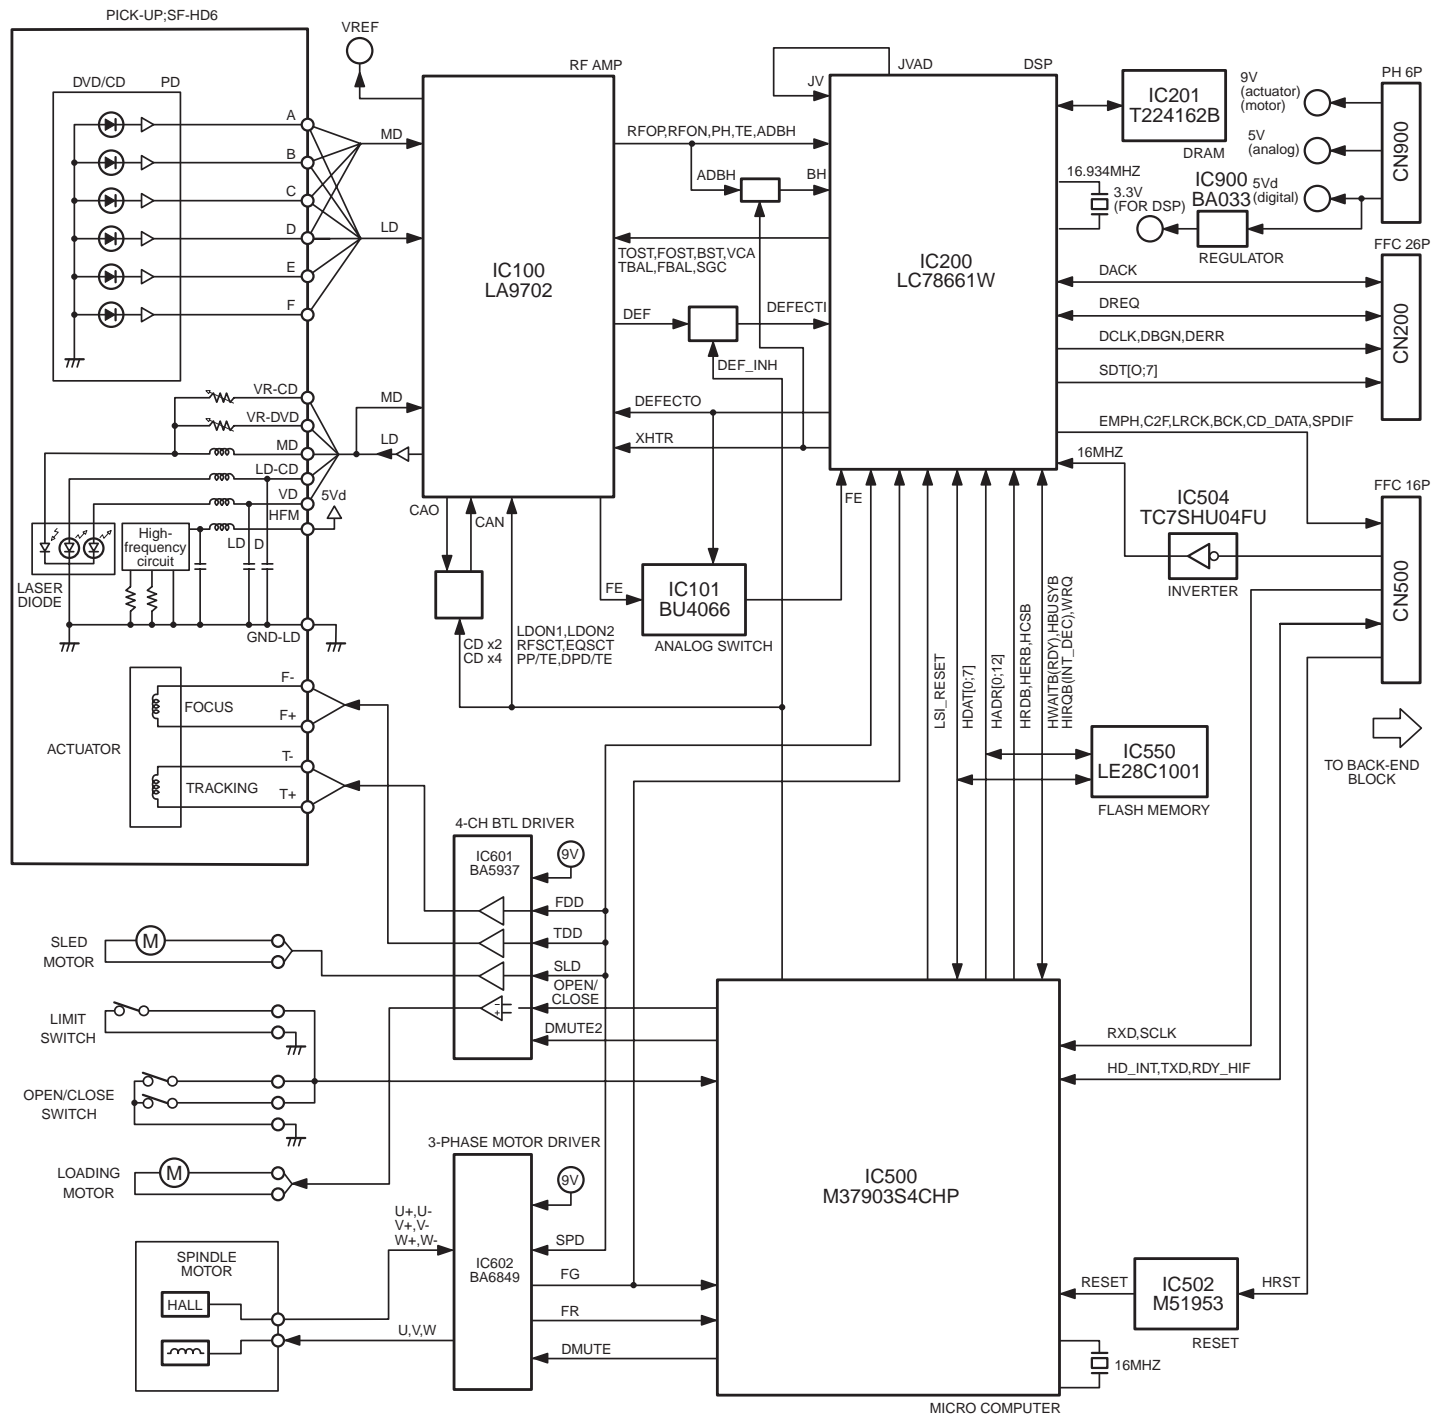

6. Match the hole of GEAR ⑦ and hole of chassis while turning GEAR ⑥.
7. Match the mark of LOADING GEAR ⑧ and gear of TRAY where see horn hole ⑨ of tray.
8. Push a tray with the state that turned the entire surface of a tray into approximately 5 degrees the lower part slowly.

DVD P.W.BOARD OPERATION

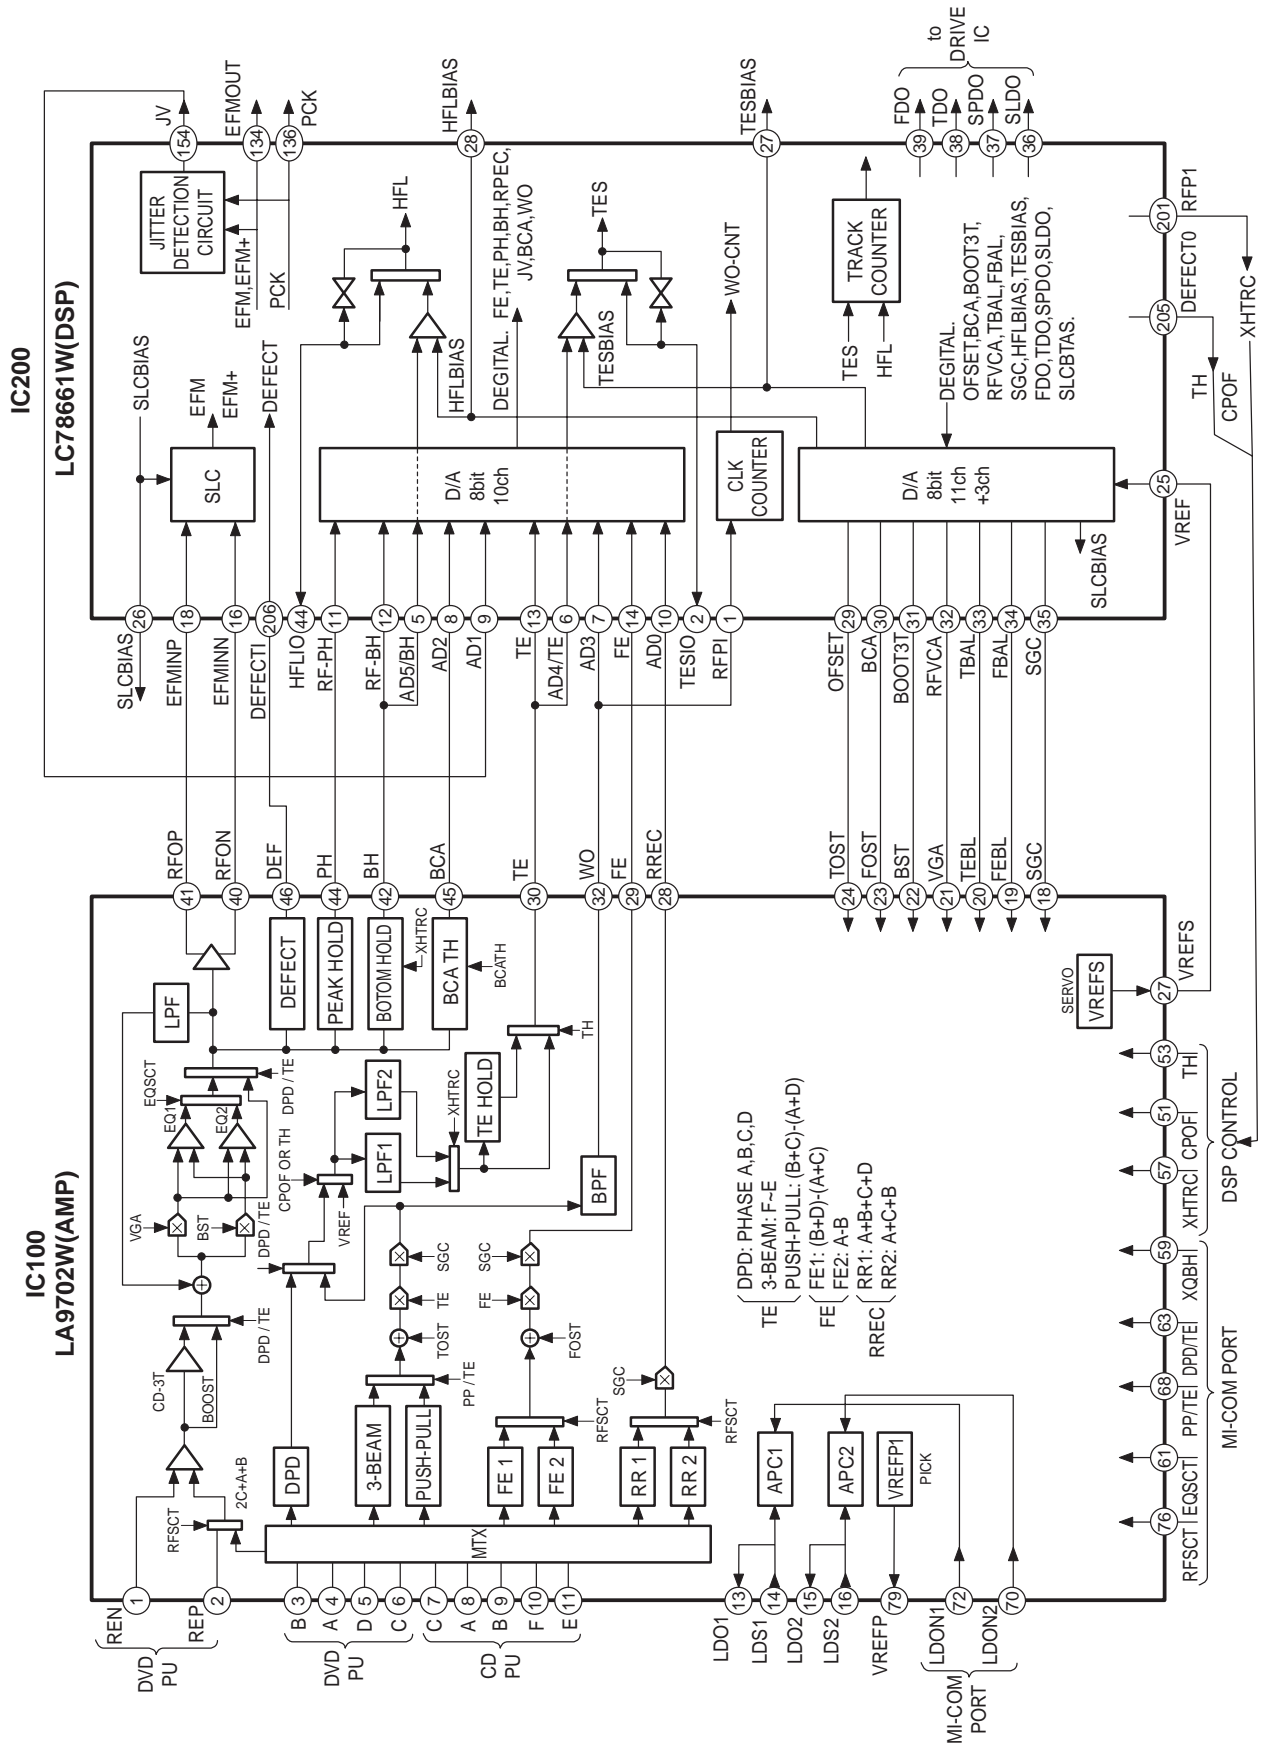

1. General operation diagram (This is a basic general operation diagram)

The circuit mounted on the Loader part (Frontend Board) is configured as shown , which is divided into following blocks according to main ICs.

DVD P.W.BOARD OPERATION

2. Circuit configuration inside IC100(LA9702W) and IC200(LC78660W) (This is a basic circuit configuration.)

DVD P.W.BOARD OPERATION

3. Table of monitor signals (This is a basic table of monitor signals)

A. Reference table for waveform are listed as below.

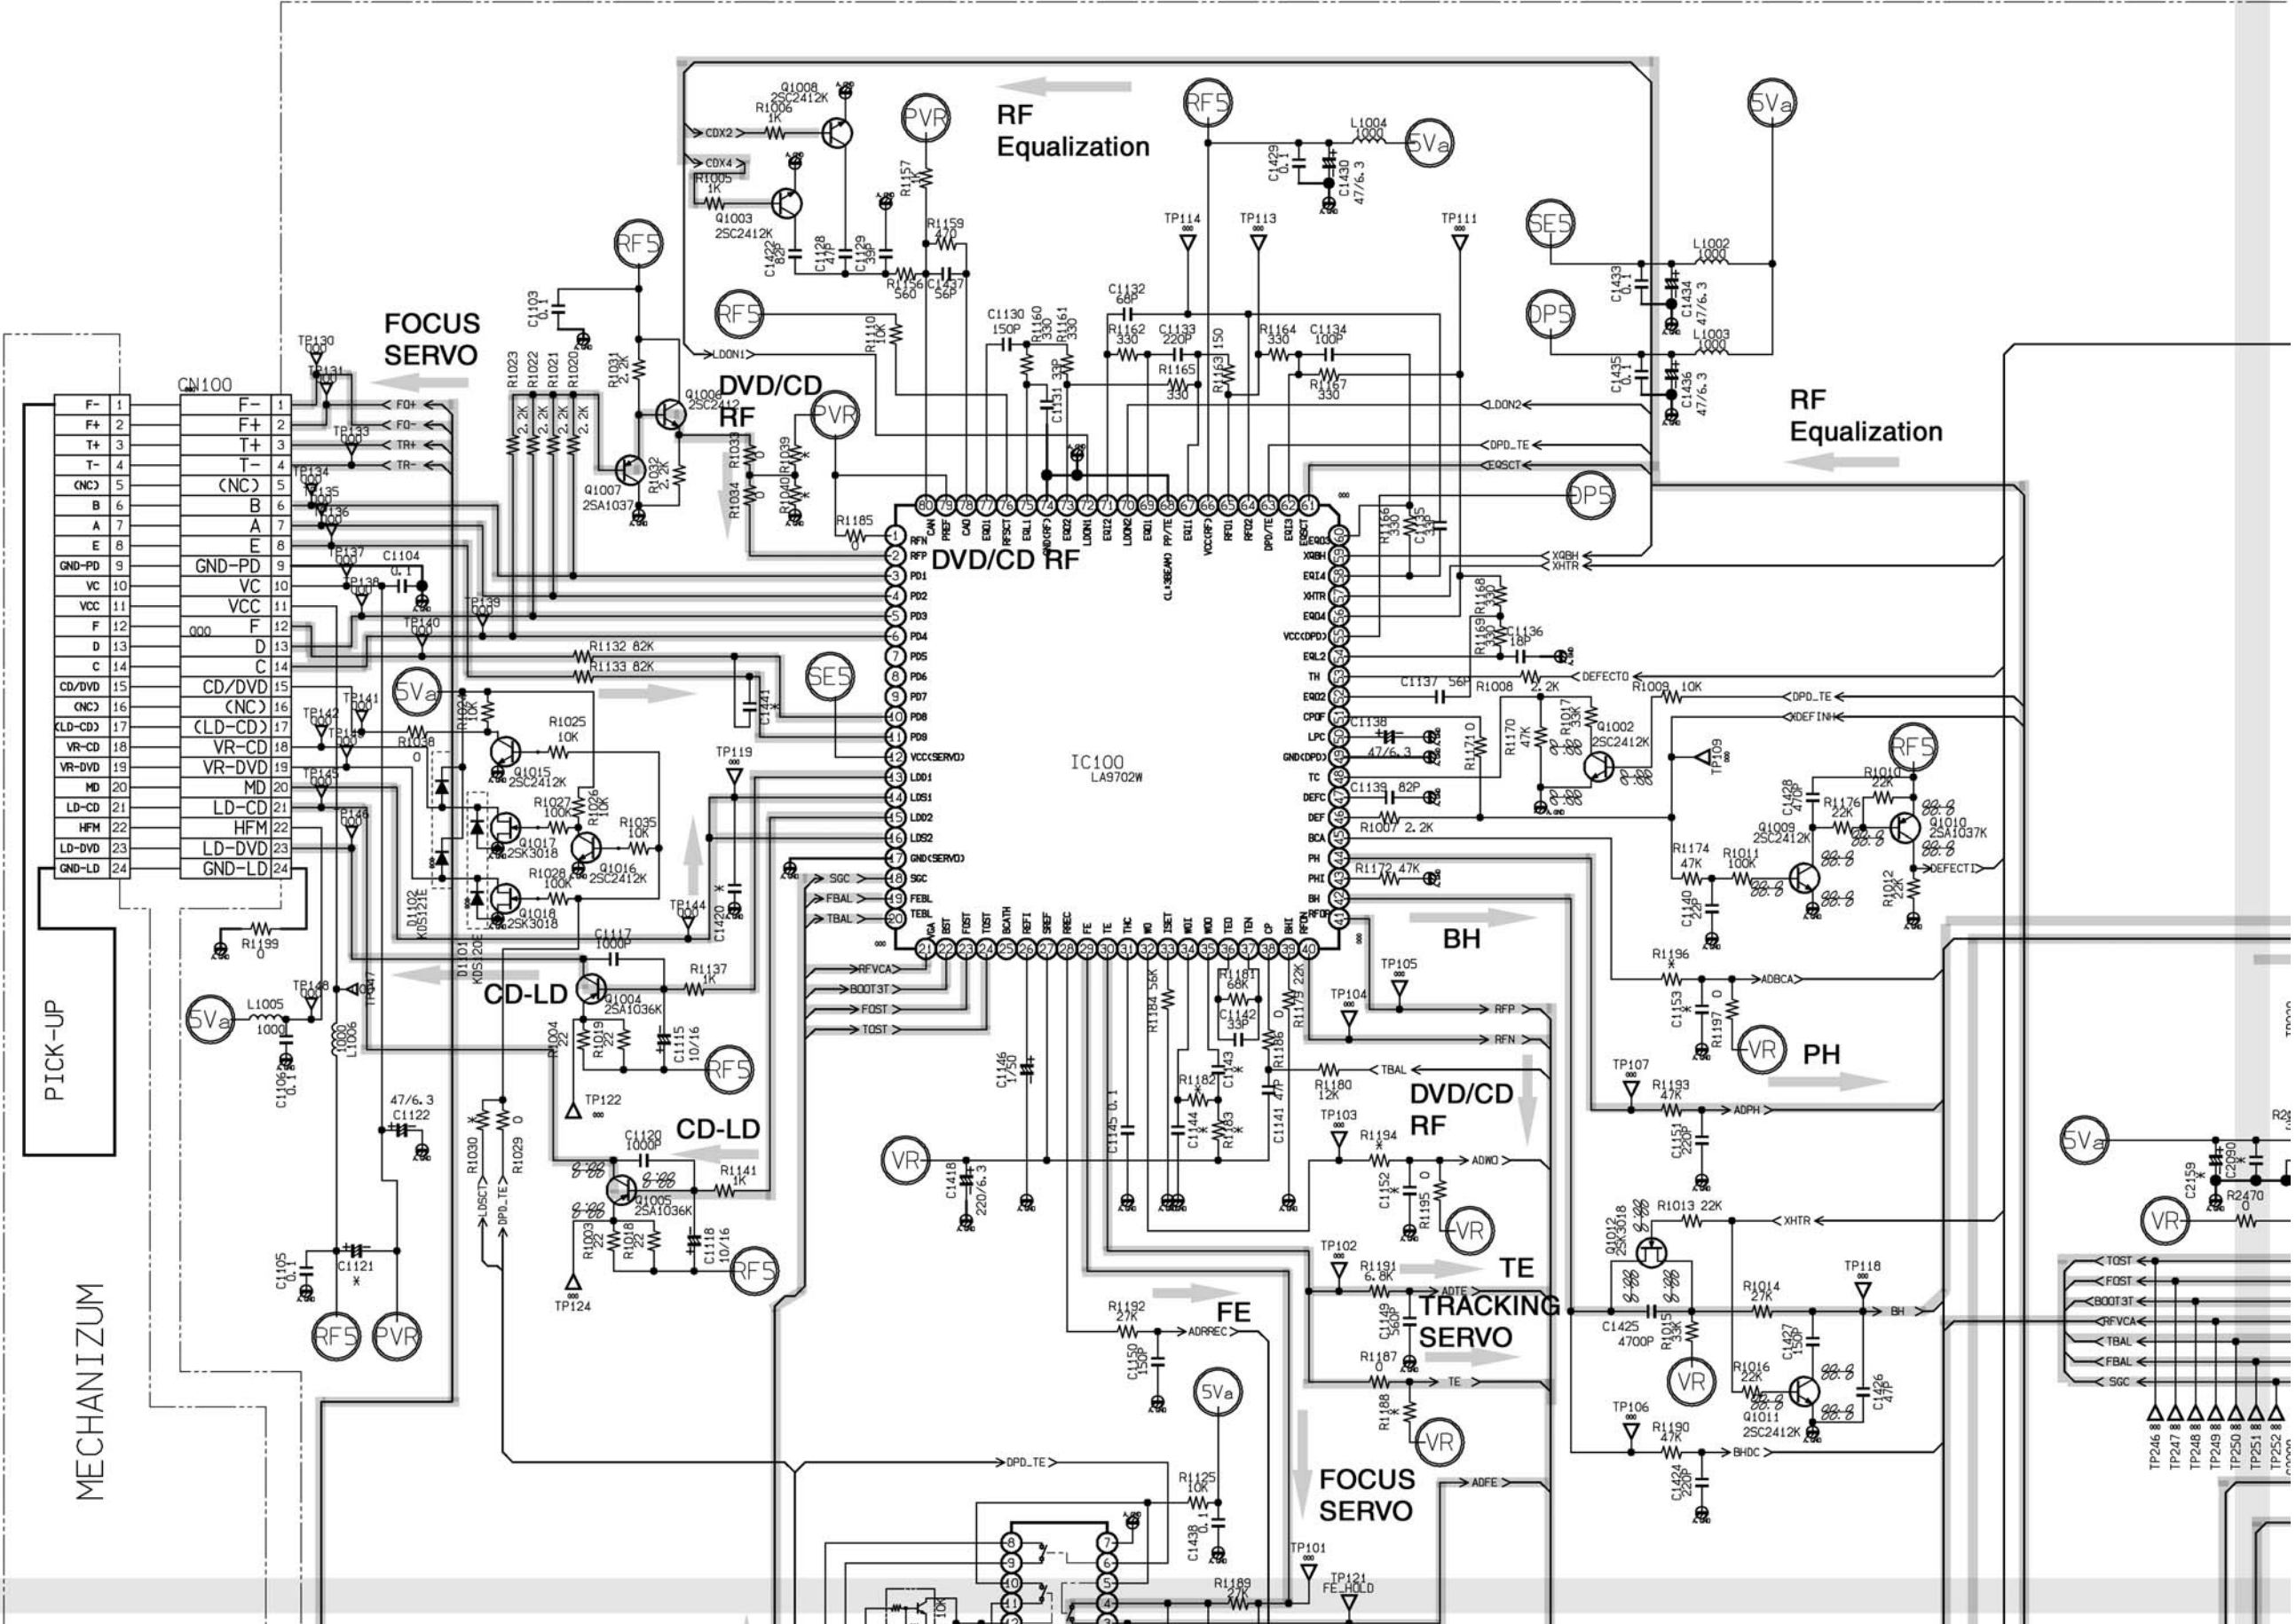

Name	TP label	IC, CN Location	Pin no.	Description
FE	TP101	IC100	25	Focus Error Signal(Analog)
TE	TP102	IC100	30	Trk Error Signal(Analog)
RFN	TP104	IC100	40	RF Signal(Analog)
RFP	TP105	IC100	41	RF Signal(Analog)
BH	TP106	IC100	42	Bottom Hold Signal(Analog)
PH	TP107	IC100	44	Peak Hold Signal(Analog)
DEF	TP230	IC100	46	High : When passing defection
LD1	TP122	Q1004	E	DVD Laser Power Supply(Analog)
LD2	TP124	Q1005	E	CD Laser Power Supply(analog)
TESI0	TP201	IC200	2	TES(Track crossing signal)
HFLBIAS	TP204	IC200	28	MIRROR Slice Bias(Analog)
HFLIO	TP206	IC200	44	MIRROR signal
FSEQ	TP211	IC200	84	High : Sync synchronised LO : Async
EFMOUT	TP226	IC200	134	RF Digitized signal
DEFECT0	TP229	IC200	201	High : When passing defection
TOST	TP246	IC200	29	Trk Offset Control(analog)
FOST	TP247	IC200	30	Focus Offset Control(analog)
BOOST3T	TP248	IC200	31	RF EQ Control(analog)
RFVCA	TP249	IC200	32	RF Voltage Control(analog)
TBAL	TP250	IC200	33	Trk Balance Control(analog)
FBAL	TP251	IC200	34	Fcs Balance Control(analog)
SGC	TP252	IC200	35	Signal Gain Control(analog)
HFBUSYB	TP254	IC200	50	Function Busy Low during jump, adjustment so on.
JVAO	TP257	IC200	154	Jitters value(analog)
TD	TP601	IC200	38	Trk Driver out(analog)
FD	TP602	IC200	39	Focus Driver out(analog)
SPD-FG	TP604	IC602	24	Spindle FG signal
W	TP621	-----	-----	Spindle Coil Voltage
V	TP620	-----	-----	
U	TP611	-----	-----

U+	TP618	-----	-----	
U-	TP617	-----	-----	
V+	TP616	-----	-----	
V-	TP615	-----	-----	
W+	TP614	-----	-----	
W-	TP513	-----	-----	
H-	TP612	-----	-----	
SLD	TP607	IC200	36	Sled Driver out(analog)
SPD	TP608	IC200	37	Spindle Driver out(analog)
OPEN	-----	IC601	16	TRAY control signal
CLOSE	-----	IC601	15	TRAY control signal
OPEN-SW	TP627	CN600	5	TRAY Limit SW
CLOSE-SW	TP626	CN600	3	TRAY Limit SW
HRST	TP700	CN500	2	RESET from Backend
RESET	-----	IC502	6	RESET to Micom
VREF	-----	IC100	27, 79	Reference Voltage(2.5V)

Top left zoon , There is the drawing which zoomed to 10,11 page.

The schematic diagram illustrates a complex electronic circuit for a multi-channel servo motor driver. The circuit is powered by a 3V battery and a 5V regulator. It features three main servo channels: TRACKING SERVO, FOCUS SERVO, and SLED SERVO. Each channel includes a servo motor (IC200, LC78661W) and a feedback potentiometer (IC201, T2241608). The circuit also includes a DVD player interface (IC202, T2241608) and a CD player interface (IC203, T2241608). The schematic shows various components like resistors, capacitors, and integrated circuits, along with their pin connections and power supply rails.

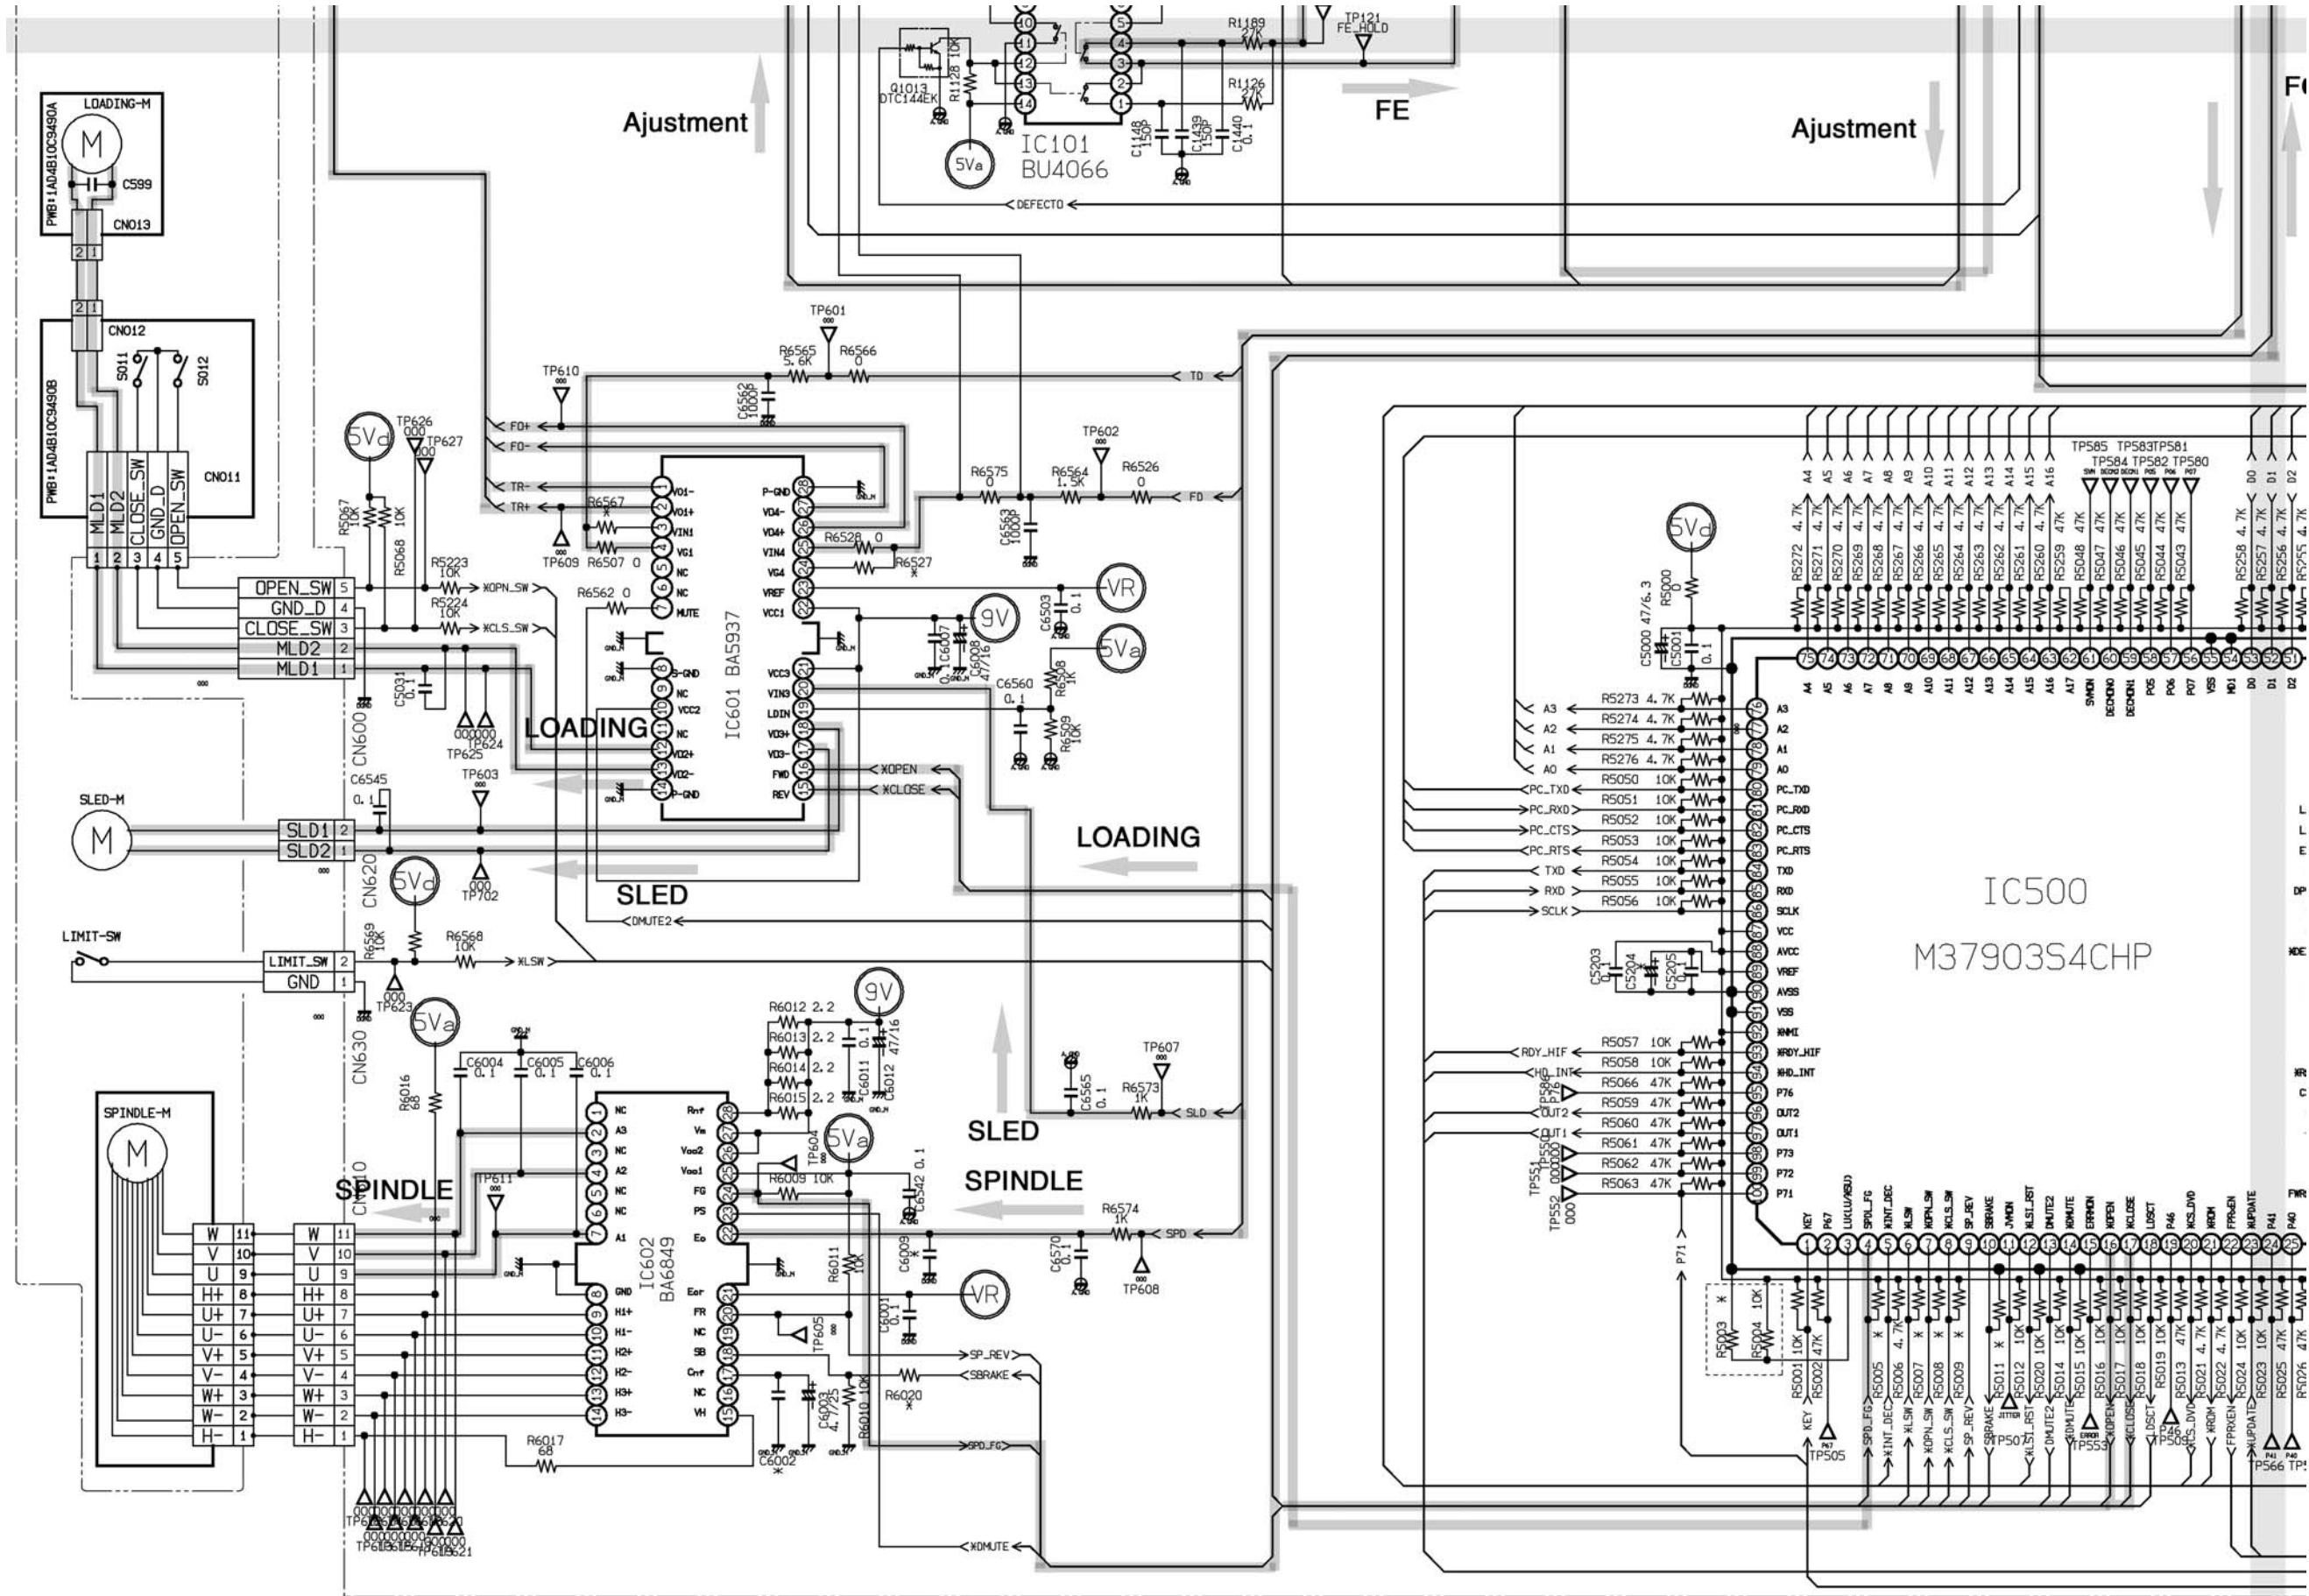

Bottom right zoon , There is the drawing which zoomed to 16,17 page.
